

DERMODOO

Skin healing foam

Bimeda®
百美达

**AN INNOVATIVE FORMULATION OF PLANT EXTRACTS
TO ADDRESS A WIDE RANGE OF SKIN ISSUES**

INDICATIONS

Skin healing - Speeding up scar and wound repair

Synergistic properties of active ingredients contained inside Dermodoo's marigold (*Calendula officinalis*) extract all promote skin tissues' reconstruction. As a result, Dermodoo can help speed up wound healing on both skin and mucosa: stitches, superficial scratches, ulcers or allergic dermatitis.

Anti-inflammatory and anti-microbial - Relieving symptoms of skin allergies

Demonstrated anti-inflammatory and antimicrobial effects of marigold flower's components reduce skin inflammation, irritation and itching. Hence applying Dermodoo can help relieve symptoms in most cases of mild skin allergies and rashes, including atopic dermatitis and urticaria.

Expansive foam presentation - Allowing a better repartition of the product

Dermodoo's foam presentation enables a better repartition of the product over the skin, inside cavities, and on non-smooth or difficult-to-reach skin and mucosa areas, which translates into better therapeutic outcomes.

See reverse for Administration & Dosage

BENEFITS

- Promotes skin healing process
- Reduces inflammation and itching
- Unique foam presentation

Dermodoo®

Skin healing foam

PACKAGING

75ml pressurized aerosol container.

CATEGORY
